1. Introduction

Flipkart is one of the leading e-commerce platforms in India. It allows users to search, compare, purchase, and track products through a mobile application and website. The platform offers a wide range of products including electronics, fashion, home appliances, groceries, and more.

The objective of this case study is to analyze the user experience of the Flipkart mobile application, identify strengths and weaknesses, and propose improvements that can enhance customer satisfaction and usability.

UX CASE STUDY

FLIPKART MOBILE APP

About Flipkart

Flipkart is one of India's leading e-commerce platforms. It offers a wide range of products with easy search, good offers and fast delivery.

Objective

To analyze the Flipkart app experience, identify pain points and suggest improvements that can make shopping easier and better.

- User:** Online Shoppers
- Platform:** Android App

1. WHAT I SEE (Current Experience)

Problem 1: Limited Cart Capacity

Flipkart allows only 20 products in the cart. Sometimes I want to compare more products or save for later, but the limit stops me.

Problem 2: Add to Cart Not Clearly Visible

When I open a product page, I first see price. But Add to Cart button is far below. I have to scroll down to find it.

Problem 3: Need to Search Reviews on YouTube

To know more about a product, I have to leave the app and search on YouTube for reviews. It takes extra time.

2. WHAT I IMPROVE (My Suggestions)

Improvement 1: Increase Cart Capacity

Increase cart limit from 20 products to 40 products so users can compare and save more items easily.

Benefit

- ✓ Users can add more products.
- ✓ Easy comparison between products.
- ✓ Helpful during sales & offers.

Improvement 2: Add to Cart Button Below Price

Place Add to Cart button just below the price so it is clearly visible and easy to use.

Benefit

- ✓ High visibility of Add to Cart.
- ✓ Faster decision making.
- ✓ Better user experience.

Improvement 3: Add YouTube Review Section

Add a section with YouTube review videos inside the product page so users don't need to leave the app.

Benefit

- ✓ Saves time.
- ✓ Helps in better decision.
- ✓ More trust and confidence.

Conclusion

Flipkart provides a smooth shopping experience. By increasing cart capacity, making Add to Cart more visible and adding YouTube reviews, we can make the app more user-friendly and help users shop with confidence.

2. User Journey Analysis

Step 1: Launch Application

The user opens the Flipkart app and lands on the home page.

Step 2: Search for Product

The user enters a product name in the search bar and receives a list of relevant products.

Step 3: Product Exploration

The user views product images, specifications, ratings, reviews, and pricing information.

Step 4: Add Product to Cart

The selected product is added to the shopping cart.

Step 5: Checkout Process

The user reviews cart items, enters delivery details, and selects a payment method.

Step 6: Order Confirmation

The order is confirmed and tracking information becomes available.

3. Strengths of Flipkart

Easy Navigation

Products are organized into categories making browsing simple.

Fast Search System

The search feature quickly provides relevant results.

Product Information

Detailed specifications, images, ratings, and reviews help users make decisions.

Multiple Payment Options

Users can pay using UPI, Credit Card, Debit Card, Net Banking, Wallets, and Cash on Delivery.

Order Tracking

Real-time order tracking improves customer confidence.

4. Weaknesses Identified

Limited Cart Management

Users may want to save many products for future purchase or comparison but cart capacity feels limited.

External Research Required

Users often leave Flipkart and search YouTube for reviews before purchasing.

Add to Cart Visibility

The Add to Cart option could be more prominent when viewing pricing information.

5. Proposed UX Improvements

Improvement 1: Increase Cart Capacity

Problem

Users who compare many products may find the cart restrictive.

Proposed Solution

Increase cart capacity from 20 products to 40 products.

Benefits

- Better product comparison
- Convenient future shopping
- Improved user satisfaction

Sample Sketch

Shopping Cart

Total Items: 40

Improvement 2: Place Add to Cart Directly Below Price

Problem

Users focus on the product price first and then search for the Add to Cart button.

Proposed Solution

Display the Add to Cart button immediately below the product price.

Benefits

- Faster purchase decisions
- Improved visibility
- Better accessibility

Sample Mockup

₹24,999

[ADD TO CART]

[BUY NOW]

Improvement 3: YouTube Product Review Integration

Problem

Many users leave the Flipkart application to watch YouTube reviews.

Proposed Solution

Add a section containing relevant YouTube review videos directly within the product page.

Benefits

- Saves user time
- Builds trust
- Helps users make informed decisions

Sample Mockup

Product Reviews

- ▶ Unboxing Review
- ▶ Full Product Review
- ▶ Performance Test

Watch on YouTube

6. Expected Impact

The proposed improvements can significantly enhance the shopping experience by:

- Reducing user effort
 - Increasing user engagement
 - Improving product research
 - Supporting better purchasing decisions
 - Increasing customer satisfaction
-

7. Conclusion

Flipkart provides an efficient and user-friendly shopping experience. However, certain usability improvements can further enhance customer convenience. Increasing cart capacity, improving Add to Cart visibility, and integrating YouTube product reviews can create a more seamless and informative shopping experience. These enhancements would help users shop more confidently and efficiently while improving the overall user experience.
